

Cills and Thresholds

Aluminium cills with pre-drilled screw ports and aluminium **screw-in ends caps** available in our standard stock colours. Cill sizes are **90mm, 150mm, 190mm and 230mm**. Standard 150mm without pre-drilled screw ports in White and Black.

Standard Threshold

Our **Standard Threshold (55mm)** or weathered threshold provides the utmost protection whilst still looking sleek. The standard threshold acts as a full weather break, keeping your home dry and warm regardless of outside elements. Hence, for external bifolding doors, the standard 55mm is recommended.

Low Threshold

Our Low Threshold (20mm) doesn't offer as much weather protection but creates a seamless look. Lower thresholds are less of a trip hazard than higher ones so are more suited for those with mobility issues or small children. While the design may be more striking, we don't recommend this for external bifolds unless in sheltered areas.

Low Threshold with Rebate

A 20mm rebate can be attached to our low threshold, making it only slightly higher at 40mm. The lip of the rebate gives extra weather protection against the elements.

Low Threshold with Ramps

When a threshold can't be sunk below floor level and accessibility is required, a ramp can be added either side of the low threshold.

This is an optional extra on the low threshold.
